A Subsidiary of James Fisher and Sons
Public Limited Company

26 July 2007

James Fisher acquires NDT Inspection and Testing Ltd.

James Fisher plc announces the acquisition of the privately owned UK based NDT Inspection and Testing Ltd (NDT).

NDT provides integrity critical plant inspection and component testing services to a wide range of clients across most sectors of industry. The company, which is UKAS and NADCAP approved, employs more than 50 fully qualified permanent staff at its three sites which are strategically located across the UK to provide nationwide coverage as well as support services for projects in Europe. The NDT business will become an integral part of James Fisher Inspection and Measurement Services (JFIMS) Limited.

The acquisition brings together complementary technical capabilities and market presence in the non-destructive examination market to the benefit of both NDT's and JFIMS's customers. In NDT's core markets in aerospace and process industries JFIMS reinforces the commitment to the customer base and offers the opportunity to build upon NDT's capabilities with the application of enhanced inspection service offerings using modern digital radiography. In JFIMS's core nuclear, defence and industrial markets NDT offers our customers on-site in-situ inspection and extensive off-site capabilities.

Paul Read, the Managing Director of JFIMS said: "Acquiring NDT represents the latest step in fulfilling our commitment of capability, availability, quality and value to our customers requiring inspection and testing. The acquisition complements our existing products and services, strengthens our market presence and moves us towards becoming a major UK provider of inspection and measurement services. I believe the acquisition is a very positive development for our customers, the NDT customers and the NDT employees. I look forward to working with the NDT team to develop the business further and focussing on delivering value added services to our customers."

James Fisher Inspection and Measurement Services (JFIMS), a subsidiary of James Fisher and Sons, provides inspection and measurement capabilities for the nuclear, defence, homeland security, aerospace, offshore and other industries. The core business activity is the use or measurement of radiation to protect, inspect or characterise. In partnership with international market leaders the company offers a range of products and services addressing radiation measurement, radiological protection, non destructive testing and non destructive examination requirements.

The company supplies both portable and installed radiation protection instrumentation for the protection of personnel, the workplace and environment and Chemical Biological Radiological Nuclear (CBRN) detection equipment. JFIMS have highly experienced personnel with knowledge of a wide portfolio of inspection and measurement hardware including X-ray generators and imaging systems. Operating from bases located in the north and south of the UK, JFIMS has the capability to deliver comprehensive service and support to ensure the maximum value is obtained from systems. JFIMS staff can support products throughout their lifecycle, from installation and commissioning, warranty support, calibration, planned and breakdown maintenance, spares provision and integrated logistical support.
